

Internship Competence Mapping Form

Applied Data Science and Artificial Intelligence

1. Student Information

- Student Name:
- Matriculation Number:
- Campus:
- Company:
- Internship Duration:
- Academic Supervisor:

2. Internship Description

Brief description of project scope and technical responsibilities:

3. Competence Mapping (EQF Level 7)

The internship must demonstrate competence equivalence across all relevant dimensions for the selected modules.

Competence Dimension	Module Requirement (Specify Module)	Internship Activity / Responsibility	Concrete Evidence Provided	Supervisor Validation
Advanced Knowledge	Demonstrates advanced theoretical understanding of methods/architectures relevant to module		Architecture documentation / method explanation	
Method Design	Independently designs/adapts models, pipelines, or business strategies		Design justification	
Technical Implementation	Implements advanced AI/DS systems independently		Code repository / technical documentation	
Experimental Rigor	Conducts structured experiments & model comparison		Experiment logs / evaluation tables	
Evaluation Mastery	Applies appropriate quantitative metrics		Performance analysis report	
System Architecture	Demonstrates architecture-level reasoning (technical or strategic)		System diagrams / strategy documentation	
Scalability / Deployment	Considers scalability, deployment, or sustainability		Deployment proof / scalability discussion	
Strategic / Business Reasoning (if applicable)	Demonstrates business model or strategic analysis (Entrepreneurship / Leadership)		Business model / risk analysis	
Autonomy & Responsibility	Makes independent decisions and justifies them		Reflection + viva confirmation	
Critical Evaluation	Identifies risks, bias, limitations, trade-offs		Dedicated report section	
Communication	Presents complex results clearly		Presentation slides	

4. Academic Decison

- ☐ Full competence equivalence confirmed
- ☐ Partial equivalence – additional academic requirements
- ☐ Replacement denied
