

Internship report

Applied Data Science and Artificial Intelligence

[Name, First Name]

[Student number]

Submission date: [Date]

Basic information about the practical phase

Name	
Study focus	
Student ID	
Internship period	
Weekly work time	
Company / University, Research Institution/ Organization (with address)	
Department / project	
Internship supervisor/ Internship supervisor on site (if it is a research project)	
Position of internship supervisor	
Telephone internship supervisor	
E-mail internship supervisor	
Motivation for the internship	
Internship content and goals	

Activities carried out in detail	
Qualitative and quantitative evaluation of the work done by the student.	
Contribution of the internship to the development of professional competences in the field of the study program.	
Student's signature	
Signature of the internship supervisor and stamp of the company	

Table of contents

1. General information and job description	1
1.1 Description of the employer	1
1.2 Description of tasks and results	1
1.3 Findings from the practical phase	1
2. Report book on competence acquisition	3
3. Confirmation of accuracy.....	6

1. General information and job description

[NOTE: This section 1 should provide a compact (**min. 3.500 / max. 4.500 words**) and meaningful (not just bullet point lists) overview of the practical phase. **If the number of words falls below 3.500, the practical report is considered insufficient for the award of ECTS credits, for formal reasons alone!**]

1.1 Description of the employer

[TEXT: Description of the company/organization with which the practical phase was completed, in particular name, location, industry, size of the employer (in particular number of employees), size and tasks of the department/division in which you worked (if applicable, several).

Also describe the application process, i.e., how you became aware of the position (specific application portal, company job portal, contact via previous interns, etc.) and how the application process went.]

1.2 Description of tasks and results

[TEXT: Describe core tasks / results you have contributed to and competencies you acquired. This section is a compact summary of the report book on your competence acquisition (quintessence; see the table in chapter 2) as a structured flowing text].

1.3 Findings from the practical phase

[TEXT; Note: Briefly present the professional, personal and, if applicable, cultural experiences in discussion with the knowledge acquired in the study program so far. Please use the questions/hints given below as a rough guideline for possible content:

- What are the practical job requirements for entering the job market in the field in which you have completed your practical phase?
- What professional and personal prerequisites do you already possess for entering the job market? Which ones do you need to develop or correct?
- Which concrete work assignments did you carry out by yourself, which within a team?
- Name concrete tasks or problems within the practical phase and your approach to solving them!
- Have you had any intercultural experiences? If yes, which ones? What insights did you gain into the economic and social culture of your host country (in the case of a practical phase abroad)?
- Which career goals are you aiming for after your experiences in the practical phase?]

2. Report book on competence acquisition

1. Professional competence

Professional competence (cf. Pfäffli, 2005; Kopf, Leipold, & Seidl, 2010; Nerdinger, Blickle, & Schaper, 2011) refers to specialized knowledge and methods that are necessary for accomplishing specialized tasks and solving specialized problems.

Professional competence includes, for example:

- expert knowledge
- expert skills
- language skills

2. Methodological competence

To achieve a goal, it is necessary to proceed methodically or systematically; in doing so, one acts according to a plan. Methodological competence is therefore understood as planned behavior. Methodological competence includes knowledge, skills and abilities that enable tasks and problems to be mastered by selecting, planning and implementing sensible solution strategies.

This requires, among other things:

- ability to gather information
- planning ability
- ability to analyze
- decision-making ability
- transferability

3. Social competence

Social competence encompasses all knowledge, skills and abilities that enable one to act appropriately in relationships with people. To relate to others successfully and work constructively with them, it is necessary to be responsive to their needs.

Social competence includes, for example:

- ability to work in a team and willingness to help others
- social responsibility
- communication skills
- ability to delegate
- tolerance
- ability to accept criticism

4. Self competence

A self-competent person can behave appropriately in the environment and adapt to it and its values out of insight. He/she is able to handle tasks by her/himself and on his/her own responsibility out of his/her own insight.

This includes:

- willingness to take responsibility
- motivation
- initiative and commitment
- ability to organize oneself
- willingness to learn and perform
- ability to accept criticism

Task: Please enter at least **three to five activities** in the table **for each competency** and explain in detail in the right-hand column how they contributed to the acquisition of each competency.

Competence	Activities	Activities in detail and contribution to the acquisition of competencies
1. Professional competence	- Getting to know and understanding the processes of personnel management 	- Reading the internal manual for personnel management; discussions with the employees of the human resources department about the processes and difficulties
Competence	Activities	Activities in detail and contribution to the acquisition of competencies
2. Methodological competence	- Developing a concept for the selection of applicants 	- Discussions with specialist managers about the requirements for applicants
Competence	Activities	Activities in detail and contribution to the acquisition of competencies
3. Social competence	- Introducing myself to the team and the direct manager 	- Getting to know people professionally; networking
Competence	Activities	Activities in detail and contribution to the acquisition of competencies
4. Self competence	- Independently implementing measures for the selection of applicants 	- Formulating a job advertisement and selecting applicants by conducting telephone interviews

--	--	--

3. Confirmation of accuracy

I hereby confirm the accuracy of the information I have provided regarding the practical phase I have completed. I have written the report by myself and have marked other sources as such.

Location, date	Signature (student)

Attachment

- Work or interim reference letter by the company/supervisor with information regarding working period, hours per week, work tasks/assignments, assessment of work
